

MICROFLEX WITH RADIAL SET SCREWS

1 Ncm

PROPERTIES

FEATURES

- ▶ very small dimensions
- ▶ backlash free
- ▶ vibration damping

MATERIAL

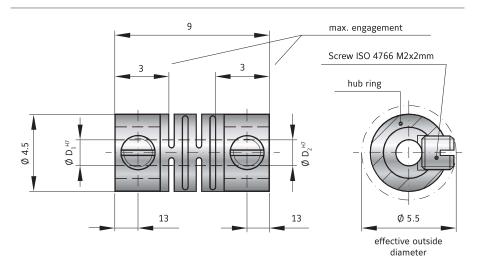

- ► Flex element: high strength Polyamide
- ► Hubs: stainless steel

DESIGN

Two hubs with set screws mounted to a flex beam segment. Operational from -35° to +80° C. Speeds up to 20,000 rpm *

SPECIAL SOLUTION

Effective outside diameter can be reduced to 4.5mm through the use of M2x1.5mm screws.

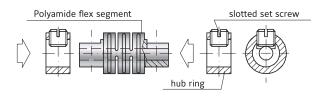

MODEL MFK1/001/9

SIZE					
Rated torque	(Ncm)	T _{KN}	1		
Standard bore H7	(mm)	D _{1/} D ₂	D ₂ 1.5 / 1.5 or 2 / 1.5 additional bore diameters available upon request		
Moment of inertia	(gcm²)	J _{ges.}	5.39		
Approximate weight	(g)		0.47		
Torsional stiffness	(Ncm/rad)	C _T	23 (measured at +20° C)		
Axial	(mm)		0.2		
Lateral	(mm)	Max. values	0.1		
Angular	(degree)		1.5		

ORDERING EXAMPLE	MFK1	001	9	1.5	1.5	xx
Model						Special designation only (e.g. special screw size).
Size						
Overall length mm			•			
Bore D1 H7				•		
Bore D2 H7						

For custom features place an XX at the end of the part number and describe the special requirements (e.g. FK1 / 001 / 9 / 1.5 / 1.5 / XX; XX=M2x1.5mm screws)

COUPLING ASSEMBLY AND MOUNTING

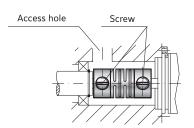

The screw threads through the clamping ring, through a slot in the flexible segment, and down onto the shaft, securing the entire assembly. Including a flat on the shaft can improve torque transmission.

Caution: Always use a precisely calibrated torque wrench during installation.

DISMOUNTING

For dismounting, simply loosen the set screws and remove the coupling from the shafts.

All data subject to change without notice.
